

Maths plan for week 2 after half term

This week will be a chance to practise multiplication and division. Some of you will find this tricky so there are videos on Active Learn, which will remind you how to do these methods. Take your time and don't panic if you find the work tricky. If it really is beyond you, then use this week to practise your times tables until you REALLY know them.

Monday	Dog divisions When you have finished the sheet, challenge yourself to come up with your own animal divisions questions (and answers) to practise other times tables.
Tuesday	Track them down.
Wednesday	Value for Money
Thursday	Multiplication and division sheet – ladder workout.
Friday	Tiling teaser
