

Maths Plan for week 4 after Summer half term break

This week is all about practising the skills we already have. Some of you will whizz through this work, and then you can do some extra Sumdog or Active Learn games. Some of you will find this trickier – that is okay because we all learn at different speeds.

Monday	<p>Adding and subtracting money. Page 4 and 5. You might be able to do this in your head, or you might need to write the calculations down in columns. Either way is fine, as long as you get the answers correct! Remember to line up the pounds and pence carefully. Squared paper will help with this. Look carefully at how the 40p is written, and how the £2 is written.</p> <table border="1" data-bbox="395 658 1385 927"> <tr> <td></td> <td>£</td> <td>4</td> <td>.</td> <td>3</td> <td>0</td> </tr> <tr> <td></td> <td>£</td> <td>0</td> <td>.</td> <td>4</td> <td>0</td> </tr> <tr> <td>+</td> <td>£</td> <td>2</td> <td>.</td> <td>0</td> <td>0</td> </tr> <tr> <td></td> <td>£</td> <td>6</td> <td>.</td> <td>7</td> <td>0</td> </tr> </table>		£	4	.	3	0		£	0	.	4	0	+	£	2	.	0	0		£	6	.	7	0
	£	4	.	3	0																				
	£	0	.	4	0																				
+	£	2	.	0	0																				
	£	6	.	7	0																				
Tuesday	<p>Adding and subtracting money. Page 7 and 8. Now you will be doing some subtraction so that you can find change. This works well if you count on using a number line – remember to put the price of the item at the start of the number line, and the note you are paying with at the end of the number line.</p>																								
Wednesday	<p>Calculations using mental methods. Page 12 and 13. Some of these problems have got 2 parts, so read the question carefully and make sure you understand what is happening. Most of you should try to do these in your head, but if you need to write down your working out, that is fine.</p>																								
Thursday	<p>Column addition and subtraction. Pages 39 and 40.</p>																								
Friday	<p>Adding and subtracting 5-digit numbers. Pages 42 and 43.</p>
